Sightlines Stainless Steel Low Level Area Lights

The Sightlines Stainless Steel family is a collection of architectural luminaires for recessed applications.

These clean and simplistic shapes are designed to complement any architectural expression. Faceplate designs are stainless steel, with a #4 brushed finish, combined with exposed stainless steel fasteners to minimize corrosion in exterior conditions.

The LED luminaires in the Sightlines Stainless Steel collection are available in a variety of lumen outputs to suit any requirements.

Sightlines Stainless Steel faceplates are available in both slotted and open face versions. The slotted faceplate is designed to eliminate glare and provide illumination on paths, aisles and stairs. The open face has a prismatic glass lens for areas that require higher intensity levels.

Detailed information on specific Sightlines Stainless Steel can be found on our website.
