

# Crystal Beach Park Woodward, OK

**Architect** Studio Architect  
Oklahoma City, OK

**Goals** To improve the quality of life for the citizens of Woodward and to create a recreation environment that would spur economic development in the city.

**Challenge** To maintain the unique architectural character and features that honor the past, while adding new facilities that make Woodward stand out.

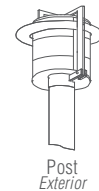

## ORCHESTRA CIRCLE

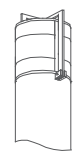

POST | BOLLARD | WALL ARM | SCNCE | PENDANT | CEILING

The Orchestra Circle family of luminaires from Rebelle Architectural Lighting ease the specification of lighting by providing various scales and configurations within one coordinated family of luminaires.

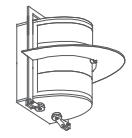

The Crystal Beach Park project uses post top, bollard, sconce, wall arm, pendant and ceiling mount luminaires from the Orchestra Circle family. Although different configurations are used, each luminaire is easily identifiable as being from one family. This creates a unified and coordinated space throughout the park. Improving the quality of life, these luminaires push darkness away and invite life. While illuminating the new facilities these luminaires also shed light on the unique characteristics of this park and historical surrounding area.
