

Encore Photometric File Information

Encore Wall Mount **ENC0**

The IES file(s) should be spaced from the wall 3.65" for the integral canopy and 2.25" for the remote canopy.

For a double module luminaire choose files with the appropriate optic, the upper file should be rotated 180 degrees and stacked above down file with the two files spaced the specified fixture length apart (12", 18", 24" or 30").

For example, ENC0-XX-13L-30-SP can be combined with ENC0-XX-13L-30-FL to create a single up/down luminaire with a spot optic up and a flood optic down spaced 12" apart, catalog number ordered would be ENC0-12"-D-13L-30-VOLT-SP-FL-Driver Location-Finish

Encore Wall Arm **ENC1**

The IES file should be spaced from the wall surface by 4.25"

Encore Ceiling **ENC2 and **ENC2S** and Pendant Mount **ENC3****

The IES file should be spaced from the ceiling by the length of the luminaire (including the stem length for a pendant). For example, ENC2-12" should be 12.5" from the ceiling surface.
